

Nfitundida Jolly Buregeya, 2007

Levels, Trends and Determinants of Female Adolescent's Sexual and Reproductive Health Behaviour in Uganda since ICPD (1995-2001).

The study aimed at meeting the following:

- To examining the levels and trends of adolescents' sexual and reproductive health behavior.
- To investigating the knowledge and utilization of available reproductive health services.
- To identifying the determinants of sexual and reproductive health behavior among adolescents.

The study relied heavily on annotative information from raw data of Uganda Demographic and Health Surveys 1995 and 2000-2001.

The study uses both the descriptive and multivariate techniques to examine the determinants of sexual behavior.
