

Taha, Elham Ibrahim, 2015.

Regional Differentials and Determinants of Child Mortality in Sudan, 2010. (321).

The study presents the levels and differentials of child mortality in Sudan.

This thesis attempts to identify the most demographic, environmental, and socio-economic determinants of child mortality in Sudan.

The main source of data is Multiple Indicators Cluster Survey Sudan 2010 (MICS 2010).

The sample of MICS 2010 was designed to provide estimates with regard to certain key indicators at the national level, (covering) the 15 states.

The study utilized both descriptive and multivariate analysis.
